Continuation of 11. does NOT place the application in condition for allowance because: The Applicant argues Ahvenainen does not teach or disclose "replacing an existing encryption key in said communications device with a new encryption key". The Examiner disagrees and maintains the rejection. Ahvenainen discloses a mobile communication system with SIM card that contain identifiers and keys and which may be attached to the mobile station detachably. The card can be physically removed from mobile equipment. The card offers services to the mobile station like inputting and changing PIN or key. (Col. 2, lines 7-12 and lines 24-46; Col. 7, lines 30-35; Col. 10, lines 11-12). Avenainen teaches maintining (inputting and changing) PIN or key which is equivalent to replacing an existing key with a new key. Therefore, all the elements of the claims limitition is explicitly or implicitly or inherently suggested and disclosed by the combination of the references on the record and the final rejection remains valid unless and otherwise the applicant added a specific limitation in to the present independent claims, to overcome the rejection without introducting a new matter.
